

TWLA-NY ATATURK SCHOOL YOUTH REPRESENTERS

**Ahmet Işık Yazal, speech title:
My Thoughts on AI and Its Impact on My Life as a Student**

At TWLA-NY Atatürk School, where I help students with their learning, I have been allowed to share my thoughts on international technology and the rise of AI.

My name is Ahmet Işık Yazal, and I am 17 years old. I am currently attending JKO High School and have had the chance to visit over 35 countries. Today, I want to talk about how AI has impacted my life as a student, highlighting its advantages.

As a student, AI has been a great tool for me. One of the most significant advantages is its ability to personalize learning. AI helps me complete tasks more easily and understand them precisely. If I don't fully grasp something in class, I can use these tools to break down the material step by step or access additional resources that will help me with my learning. It's like having a personal teacher available whenever I need it, and that has made a difference in my education.

AI also helps me save time by automating repetitive tasks. For example, it can summarize long readings, check my essays for grammar and spelling, and even organize my study materials. This allows me to focus on learning and exploring new subjects instead of getting stuck on small, time-consuming details.

In conclusion, AI has benefits for me as a student. It has made learning more efficient and accessible, I believe AI is a powerful tool that can enhance education.

Thank you.

TWLA-NY Ataturk School Youth Umay Yazal, speech title is:

AI is everywhere.

My name is Umay Yazal. I was born on January 3, 2009, in Kastamonu, Turkey. I've visited over 30 countries and have lived in places like Holland, Mongolia, the Turkish Republic of Northern Cyprus, and Turkey. Currently, I'm living in New York, where I go to JKO as a 10th-grade student and volunteer at TWLA-NY Atatürk School on Saturdays.

My international experiences and view of cultures have made me broad-minded and continue to enrich my life.

Today, I want to talk about how ICT is impacting our lives with the rise of AI.

AI is everywhere. On our phones, iPads, and laptops everywhere. I use it to get help with homework and projects. It gives me a better understanding of the assignment and changes the way I think, learn, and communicate.

Unfortunately, my school has banned ChatGPT, which I believe is not right. While some students use AI to take shortcuts, many use it as a reliable learning tool to understand a subject or an assignment better.

Instead of banning AI, schools should teach how to use AI efficiently and responsibly while maintaining academic integrity.

As the future generation, we must learn how to use technology wisely and its advantages. AI isn't something to be feared; it makes our lives better and our future brighter when used responsibly.

Thank you.

TWLA-NY Ataturk School Youth Representatives at the "Compulsory Peace Education Through Information Telecommunication Technologies (ICTs)" International Pane - Organized & Presented by The Light Millennium Global, along with the international member organizations for #CompulsoryPeaceEducationICTs Coalition -
